Body discovered at rooming house

suspicious A 59-year-old man was arrested without incident at the scene of what the Halifax Regional Police say is a murder as the body of a 33-year-old man was discovered at a rooming house at 214 Portland St. in Dartmouth last night.

Acting on information received by an East Division beat member just before 9 p.m., police say they checked the rooming house in regards to a possible injured person and found the body.

Police later arrested the 59-year-old and he was taken into custody.

Later at the scene, several residents told Metro Halifax the home where police say the murder took place is known to be a crack house. Police were expected to continue their investigation overnight.

This is the second murder in the Halifax Regional Municipality this week, and the sixth so far this vear. METRO HALIFAX

NDP platform 'pamphlet,' 'sketchy leaflet': Parties

Liberals, Tories say NDP can't balance budget with plan

PAUL MCLEOD
paul.mcleod@metronews.ca

Political parties lashed out at the NDP platform released yesterday, calling it a pamphlet designed solely to get elected.

NDP Leader Darrell Dexter called his platform a common sense plan to make life better for Nova Scotians. But Liberal Leader Stephen McNeil called it disappointing and misleading.

"This isn't a platform, this is a pamphlet. And I might add, not a very good

one," he said.
"It actually is not even truthful to Nova Scotians when you look at it. Line by line you can go down and you see it costed for one year, not over a mandate. It's simply not believ-

McNeil said the NDP document cherry-picks num-

bers instead costing them out over a period of years. singled out Dexter's high-profile promise to

remove HST Brooke Taylor from elec-

tric home heating.
The NDP document costs the promise at \$28 million over one year. McNeil said they've ignored what the promise would cost over five or 10 years.

"This is NDP accounting and it is not believable. It will not deliver the balanced budget they're talking about," he said.

Tory Transportation Minister Brooke Taylor echoed that sentiment. Taylor dismissed the NDP platform as a "sketchy leaflet that doesn't include the comprehensiveness nor the volume that Nova Scotians deserve.

Taylor disagreed with Dexter's claim he could honour Conservative promises without adding to the provincial debt.

"They would have to either add to the debt or run a deficit. It's very clear,' Taylor said.

Liberal Leader Stephen McNeil gets a hug yesterday from Bedford-Birch Cove candidate Kelly Regan as he steps off his campaign bus

On the hustings ...

• The Liberals vowed to provide free tuition to 100 students at Dalhousie Medical School who would then practise in underserved parts of the province.

Liberal Leader Stephen Mc-Neil said yesterday his party's plan would help areas of the province currently scrambling to provide doctors. McNeil said many doctors will continue to practise in Nova Scotia after their five-year commitment is done.

The plan involves providing free tuition to 20 medical students for each of the next five years.

 Premier Rodnev MacDonald said his government would increase the volunteer firefighters tax credit.

The credit of \$250 was first introduced in the 2007 budget. That was increased to \$375 last year and expanded to include ground search and rescue teams. The Conservatives plan to increase the credit to \$500 this year.

The Tories say the credit will involve a total savings of \$4.8

There are about 800 volunteer firefighters in Nova Scotia and 1,700 members of ground search and rescue teams.

 Two leaders' debates have been announced for the election campaign.

The first will take place May 19 at the CBC Studios in Halifax with the second set for June 2 from the Alexander Graham Bell National Historic Site in Baddeck. CBC and the Chronicle-Herald are sponsoring the debates.

charged with attempted murder

SHOOTING A 28-year-old man is charged with attempted murder after a man was shot Monday night in Sambro, police

Halifax Regional Police said officers arrested the man at a Venus Drive home, off of Old Sambro Road in Harrietsfield, at 2:40 a.m. yesterday. He's also facing a slew of firearms offences and was scheduled to answer to all charges in Halifax provincial court yesterday afternoon.

Halifax Regional Police said officers responded to the shooting outside of a convenience store at 1 West Pennant Rd. just after 8 p.m. Monday. When they arrived on scene they found a 25-year-old man suffering from several gunshot wounds to his leg. The victim was rushed to Queen Elizabeth II Health Sciences Centre in Halifax with non-life threatening injuries, police said.
Officers initially arrested

another man at a traffic stop on Old Sambro Road shortly after the shooting occurred, police said, but he was released without charge and his car "was kept for forensic analysis."

N.S. flu cases up to 64 with seven new mild cases

HEALTH Seven more mild cases of Influenza A (H1N1), also known as swine flu, were reported in the province yesterday.

That brings the total in Nova Scotia to 64 since the outbreak began April 26.

All of the new cases are located within the Capital District Health Authority. One is linked to the original cluster in Windsor and the other six are still under investigation.

Also, two people with the new cases started having symptoms in the last seven days. The other five were identified during retests. METRO HALIFAX

Rink waits for feds, province to chip in

metronews.ca

KRISTEN LIPSCOMBE For Metro Halifax

Halifax Regional Municipality's new four-pad arena is just one highlight from the draft budget tab led last night, but city officials admitted they have to wait on the provincial and federal governments before that and other infrastructure projects can take off.

Director of finance Cathie O'Toole said HRM won't know for sure that all cash needed for the \$40 million facility and land off Hammonds Plains Road will come until the province's budget is passed by a new Nova Scotia government and the federal government gives its nod of approval.

The municipality is con-

tributing a third of the cost for the rink but expects the other two levels of government to pick up the remaining tab, through Ottawa's economic stimulus package. The city hopes to open the arena by Septem-

"In the mean Debate time, our piece of funding is in • City councillors place, so that start debating the place, so that work is continuing," O'Toole said.
"If it looks at any

point that the de-lay ... from the province or the feds will impact the timing of our project, we'd go back to council and give them some options.'

The other two affected projects are the \$55-million Central Library and the new \$12-million WoodCanada Fund, O'Toole said

The municipal operating budget would increase by 3.6 per cent at a total of \$578 million for 2009-10, plus a gross capital amount of \$151 million, if

councillors are in favour.

O'Toole called it "a status quo" budget that maintains tax rates and municipal services. "It's continuing on with the five-year

capital plan ... but it's trying to position us a little bit better to take advantage of the infrastructure funding."

Mayor Peter Kelly said the budget isn't "overly am-bitious," but still addresses the city's needs for improved policing, fire servic-

Virgin Fest inclined to rock

HILARY BEAUMONT For Metro Halifax

MUSIC Halifax will host one of five Canada Virgin music festivals this summer on Saturday, July 4, at the Garrison Grounds of Cita-

del Hill. "We're coming to Citadel Hill on the fourth of July. Everyone tells me that's the sunniest, most beautiful day in Atlantic Canada," festival director Andrew Bridge said.

Iconic Canadian band The Tragically Hip and skate-punkers The Offspring will headline the one-day festival along with 15 to 20 other acts on two stages. Bridge said the concert would include a diverse range of international, national and local music requested online by Atlantic Canadians.

"There's a big rock scene in Halifax, so we decided to skew the lineup to be a little more rock-focused because that's what fans told us they wanted," Bridge said.

"We also think rounding off the festival with some eclectic acts, some local acts, will really create some excitement.

Johnston sentencing moved to July after lawyer's illness

SHOOTING Jerrell Johnston had his sentencing for the attempted murder of Vantino Beals in 2006 pushed back to July 9 yesterday at Scotia Supreme Court in Halifax.

Johnston, who found guilty of the charge in late February following a month-long trial, saw the sentencing postponed af-ter his defence lawyer Kevin Burke became ill and couldn't make the hearing.

It was decided between council July 9 would be the new sentence date. Johnston, who remains free on bail, was in attendance yesterday along with several supporters.

During the month-long trial in February, Johnston, along with Nathaniel Sparks, was found not guilty of second-degree murder in the shooting deaths of two North Preston men in December

Brandon Beals, 21, and Martaze Provo, 25, were shot to death outside an after-hours club on Upper Partridge River Road.

Johnston, however, was found guilty of attempted murder in the shooting of Vantino Beals that same METRO HALIFAX

Arrest made in New Glasgow after man left seriously hurt

ASSAULT New Glasgow police arrested an adult male resident of the town yesterday morning in relation to an overnight assault on the west side.

Deputy Chief Eric Mac-Neil said the Emergency Response Team, clad entirely in black and carrying weapons, entered a home on MacDonald Street to take the man into custody around 10:45 a.m. MacNeil could not say if the 48-yearold man was a resident of 354 MacDonald St., but

several other people were also escorted from the building.

The arrest follows an overnight assault that occurred around midnight on the west side of New Glasgow. Police discovered a 54-year-old New Glasgow man unconscious at a twostorey apartment building on the Stellarton Road around 12:20 a.m. yesterday morning. Const. Ken MacDonald said the man suffered serious injuries.

Private profits out of public pockets?

Corporations overpay taxes to collect federal cash, report claims

Some of Canada's largest corporations may be using the government as a high-yield investment account by deliberately overpaying on their annual tax returns to collect favourable interest rates, the federal auditor general says.

In each of the last three years, top businesses have realized a \$30-million windfall by paying a total of \$4 billion into accounts managed by the Canada Revenue Agency that cover them in the event their tax returns are reassessed.

The accounts have paid an interest rate of between five and seven per cent since 2006. The rate is considerably more favourable than that offered by the banks.

Auditor general Sheila Fraser said it appears cor-

Priorities

• Fraser suggested that the Canada Revenue Agency is more focused on collecting tax dollars than returning overpayments to companies.

porations were well aware of the favourable treatment they were getting with their federal accounts, though it is difficult to prove any company has set out to bilk taxpayers.

"No one asked the corporations or tried to determine what the motivation was, but I think we can probably arrive at that conclusion," she told reporters. "The agency did try to return the money to them and they declined."

Fraser even joked that

there could be an influx of chief financial officers looking to stash money in Ottawa in the wake of her report.

"I'm not sure in this economic time that a lot of corporations have a lot of cash to deposit with the Canada Revenue Agency, but there are obviously some and the agency has to manage this."

The Canada Revenue Agency, which collects federal tax money, has suspected that corporations were aware of their higher interest rates since at least 1991 but it has done nothing to safeguard the federal treasury. Revenue agency officials trying to return the advance payments to firms are powerless if the company opts to leave the account open.

We play well with others

n Canada, it's easy to walk on the SunnySide of the street. I say this with confidence even though I've spent many of the last three decades doing what we in the media do best — panicmongering.

That's why we're jour-nalists; we're jacked up by 200-point bold bad news headlines, the badder the better. When editors get together at the end of the year and pick the top story, it's always some disaster, never a good news story. Good news is a cute puppy that goes at the end of a newscast or on page 27, a grudging change of pace from your hard-bitten friends in the news.

Anyway, it's easy to get high on Canada because ... well, just look around you. This is the freaking second biggest country in the world. How often do we

even think about that? If you live in Vancouver, the world ends in Chilliwack, after that, there are mountains, and way, way farther away, Toronto. Scary. And if you live in Toronto, you can't venture west of Mississauga without suffering a nosebleed.

If you live in Montreal, you refuse to recognize the legitimacy of Vancouver and Toronto altogether as you sit in a café on Rue St-Denis, Centre of the Universe. Maybe it's just too big and beautiful to get your head around it, never mind your arms.

The rest of the world doesn't seem to have that

Once again, we're in the top five of the 215 nations tracked in Mercer Consulting's annual Quality of Living Survey; our American cousins barely crack the top 30 and that's because San Francisco and Honolulu skew the results. Another ranks us among the top 10 nations in the world for happiness, along with traditional warm puppies Denmark and Switzerland

And if you're not tired of surveys yet, how about this

Sunny**Side**

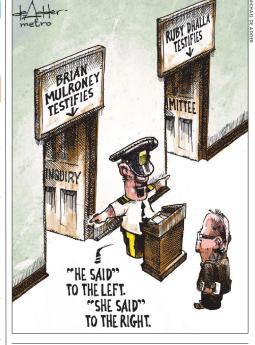

one? While the rest of the world is in the economic tank, the Economic Intelligence Unit's global business survey for 2009-13 ranks Canada first in the G7 as "the best place to invest and do business."

Who knew? The very best thing about Canada is the thing that infuriates many, but makes us the hope of civilization — it's called multiculturalism, which means whoever you are, wherever you're from, you check your guns at the door, and if you want to live here, you learn to play well with others.

On this sunny day, let's give the last word to an American, one of our biggest fans: Bill Clinton.

'In a world darkened by ethnic conflicts that tear nations apart, Canada stands as a model of how people of different cultures can live and work together in peace, prosperity, and mutual respect.

Paul Sullivan is a Vancouver-based journalist and owner of Sullivan Media Consulting; vancouverletters@metronews.ca.

Our company is stronger because of the recession

Re: SunnySide launch (May

company, Cleanworks, is stronger because of the recession.

In January we met with our staff and told them that we had no plans to reduce staff in the forseeable future. We also told them that to avoid reductions in the future we would have to ensure our clients did not see us as an expendable service. We would have to make sure the quality of our service was second to none.

As well, we decided to hire staff to take advantage of a deeper pool of appli-cants to strengthen our roster of workers.

The result — our staff responded with improved quality work, our clients have indicated they are across the board happier with our service, and revenues are up 12 per cent over 2008. And now we need to hire a couple of more people.

Halifax Common is for the people not special interests

Re: McCartney in Halifax? (May 12)

I am a resident of Halifax and have lived in the neighbourhood for 28 or so years and have always loved the green space of the Halifax Common.

It is normally a grassy space free of cars and noise; a green space granted to the people of Halifax.

I have noticed the disruption of the concerts and the mess that is left on our beautiful living space. The grass is dug up and dirt and mud in its place. Garbage and dirty litter are left where a peaceful green space is usually.

If the so-called representatives at city hall think it's right to give special privileges to people with the most money and to use a public park to make money for themselves they are wrong. Halifax Common was granted to the people of Halifax and it should be protected against self-serving business deals and it should belong to everyone to be free to enjoy the space. OIL \$58.85 US 35¢

REPORT Substantially lower energy imports helped hike Canada's trade surplus in March to \$1.11 billion, more than double analysts' expectations, from

\$262 million in February. Statistics Canada said yesterday that energy im-ports had fall-

en by 18.4 per **green shoots ... as** cent during the months ahead the month, most of it in will impose volume terms renewed hits on and concentrated in aviation fuel. En- shipments and ergy exports, exports." mostly to the Derek Holt, economist fell by only

1.4 per cent. The overall surplus rose because imports fell by more — 4.4 per cent — than the 1.8 per cent decline in exports. Canada exported \$32.50 billion and imported \$31.40 billion. The figures are adjusted for seasonal factors.

But economists were quick to warn against viewing the stronger-thanexpected surplus, following two months of trade deficits, do un commic recovery.

"Be careful

with green shoots in the Canadian trade data as the months will impose hits newed on manufacturing shipments and exports as the auto sec-

tor goes back shut-down mode, said Derek Holt, economist with Scotia Capital.

Canada's economy is expected to contract sharply in the first quarter and the trade report does little to change that view, economists said.

Execs still pessimistic: Survey

PREDICTIONS Senior finance executives across the globe remain pessimistic about the prospects of rapid economic recovery and are pursuing new ways to control costs, an American Express study showed.

Nearly 70 per cent of respondents in the American Express/CFO Research Global Business & Spending Monitor survey of 285 senior finance executives said they expected to see "recovery" beginning sometime in 2010.

Over two-thirds of re-

spondents predicted modest to substantial economic contraction over the next 12 months, and 63 per cent reported that their companies' capital investments will decrease in 2009.

When asked about changes in their workforce, 59 per cent of respondents anticipated a decrease in headcount.

But companies are also taking actions now to avoid layoffs. Half the executives polled reported plans to freeze salaries and bonuses. REUTERS

Low energy imports boost trade surplus Consumer bankruptcies up But business insolvencies fall 10.3% in March from 2008

But business insolvencies fall 10.3% in March from 2008

Bankruptcies in Canada soared by more than 50 per cent in March from a year ago as the rising unemployment rate left more consumers unable to pay their bills.

At the same time, business bankruptcies declined during the month, according to figures released yesterday by the Office of the Superintendent of Bankruptcy Canada.

There were 10,578 personal bankruptcies across the country in March, up 17.3 per cent from the

Forecast

Roger Sauvé, author of a 2008 report on the financial state of Canadian households sponsored by the Vanier Insti-

tute, predicted the number of insolvencies may 160,000 this year. There were about 123,000 in 2008.

month before, and up a staggering 57 per cent from March 2008.

The biggest year-overyear increases came from the western provinces. The number of personal bankruptcies in Alberta nearly doubled to 951 in March;

in British Columbia it rose 78.4 per cent from a year ago to 960.

The increase coincided with a rise in unemployment. In March the jobless rate rose to eight per cent, its highest level in seven years. Even though the

economy added 36,000 net new jobs in April, the rate did not change.

On the business side, there were 507 bankruptcies in March, up 6.7 per cent from February, but a decline of 10.3 per cent from March 2008.

Overall, there 11,085 personal and business bankruptcies across the country in March, up 16.7 per cent from the month before, and an increase of 51.8 per cent from March 2008.

Good news for paddler

Waverley's Shaun Fair picked for Canadian sprint canoe-kayak team

MATTHEW WUEST matthew.wuest@metronews.ca

Shaun Fair's year keeps

getting better.

The Waverley paddler learned this week he has cracked the Canadian sprint canoe-kayak team for a pair of World Cup events in Europe in his first year eligible as a senior. It's an important step toward qualifying for the world championships that will be held on Lake Banook in Dartmouth in August.

The news came less than a month after he was one of 50 athletes to win \$4,000 in funding from Petro Canada in a program designed to move athletes closer to their Olympic dream.

As it turns out, the funding helped him crack the World Cup roster. He used the money to travel to Montreal to spend three weeks training with the national team, a trip he wouldn't have been able to take otherwise as a non-carded ath-

'It really helped — it would have been a lot more difficult without that grant," said Fair. "In the last three weeks before the (selection trials), there was a lot of improvement, working with the coaches and training with great athletes.'

Fair, who has competed at the Pan-American championships and junior worlds, was selected as an extra for the K-4 crew that will compete in Poznan, Poland, from May 22 to 24, and in Szeged, Hungary, from June 5 to 7.

"It's a big deal for me," said Fair. "I knew it was a possibility but I never really

thought it could happen." Fair, just 18, will have plenty of world championships to qualify for in the future, but it would be extra special this year with the

Waverley's Shaun Fair learned this week he has cracked the Canadian sprint canoe-kayak team for a pair of World Cup events in Europe later this month and in June.

event in his own back yard. Qualifying continues after the World Cups with two more sets of team trials.

"It's a matter of putting my head down and going as hard as I can every chance," he said. "The guys ahead of me are experienced athletes. Most are Olympians. It's a matter of, if I've got (what it takes), hopefully I can do it when I have to."

Sebring for all seasons

Chrysler convertible adds a touch of practicality

LORNE DRURY for Metro Canada

Only two hours by car from Los Angeles, Palm Springs has long been a favourite getaway destination for the stars.

Hollywood's finest have had off-season and weekend retreats in this desert playground since the 1920s, drawn by the beautiful weather, the mountain views and the small town atmosphere.

What makes Palm Springs so desirable is the sunshine — the valley community averages 350 days of sun a year.

days of sun a year.

Of course, with all that sunshine, a convertible is the car of choice among residents and visitors alike, and my 2009 Chrysler Sebring Convertible test car fits right in with the crowd. Almost every other car you see on the streets is a convertible and the Sebring is at or near the top of the popularity scale along with older Mercedes models and Ford Mustangs.

For anyone contemplating a convertible, my test car was equipped with a retractable hardtop, which is offered as an option. A cloth, folding top is standard. If you want a car for all seasons, this is the way to go. It has the looks and feel of a coupe for the cold weather months and it transforms into a convertible in only a matter of seconds

Volkswagen and Volvo also offer similar retractable hardtops in the Eos and C70 models, but at a higher price than the Sebring.

The Sebring Convertible is available in three trim

The 2009 Chrysler Sebring Convertible is offered with soft or retractable hardtop and the choice of three engines. Trim levels are LX, Touring and Limited.

2009 Chrysler Sebring Convertible

Type: Two-door convertible Price: IX \$20,495; Touring \$25,295; Limited \$31,695 Engine: 2.4-litre four cylinder 16-valve DOHC (173 hp, 166 lb/ft); 2.7-litre 24-valve DOHC V6 (186 hp, 191 lb/ft); 3.5-litre 50HC 24-valve V6 (235 hp, 232 lb/ft)

Highlights

- Attractive pricing
- Retractable hardtop ensures use all-year long

levels with some great prices being offered these days — the LX starts at \$20,495 with a 173 hp 2.4litre I-4 engine, the Touring at \$24,295 with a 189 hp 2.7-litre V6 and the Limited at \$31,695 with a 235 hp 3.5-litre V6. The first two come with a fourspeed automatic transmission, while the Limited's V6 comes with a six-speed automatic with Auto Stick.

During my trip I experienced both city and highway environments with the Sebring. With the larger of the two V6 engines under the hood, my tester had more than enough power for merging into traffic on high-speed freeways in and around Los Angeles. It would be nice to have a little more power than the 3.5-litre V6 offers, but it would come at the expense of fuel economy.

In the city, the car feels

heavy and a bit awkward. Its high rear end makes backing into parking spots

a bit of a chore.

With the top up, the trunk is spacious enough to hold four golf bags, although two big suitcases just fit with a bit of pushing and pulling. With the top down, trunk space is compromised with room for two golf bags. The trunk lid is extremely heavy and awkward without a handle to grab onto.

Fuel ratings for the 3.5-litre V6 automatic are 12.9L/100 km and 7.4L/100 km highway.

Hyundai plugs into futuristic Blue-Will

FIRST LOOK Hyundai unveiled its first plug-in HEV concept car at the recent Seoul motor show. Named Blue-Will, the futuristic car promises an electric-only driving distance of up to 64 km on a single charge and a fuel economy rating of up to 2.2 litres/100 km. Blue-Will is a test bed of new ideas that range from the unique profile to drive-by-wire steering and touch screen controls

Blue-Will's sleek surface treatment extends to the underbody where a fulllength cover has been applied to minimize aerodynamic drag while maximizing fuel economy.

mizing fuel economy.

The LED panel on the front expresses a highly distinctive, futuristic image. The rear bike rack, integrated into the trunk, adds convenience.

To minimize weight, carbon-fibre reinforced plastics and nano composites have been applied to the side sills, moldings and fenders.

The Blue-Will concept is powered by an all-aluminum 152 hp gasoline direct-injected 1.6L engine, coupled to a Continuously Variable Transmission and a 100 kw electric motor.

This parallel hybrid drive architecture serves as the foundation for future Hyundai hybrids, starting with the next-generation Sonata for North America.

Airbags are designed to prevent serious injury but if you don't exercise caution around them, they might be deadly.

Airbag safety 101

JIL MCINTOSH for Metro Canada

SAFETY Would you let your child put her feet out in front of her, and then have something slam into them at about 300 km/h? Of course you wouldn't. So why do you let her ride

with her feet up on the dash of your car?

Teens — and a surprising number of adults — think it's cool to ride this way. But in the blink of an eye, the airbag could cause irreparable damage.

Every new car has at least two frontal airbags, in the centre of the steering wheel, and in the passenger side of the dash. In a frontal crash, these bags inflate with hot nitrogen gas within about 40 milliseconds. The bag is coming toward you at anywhere from 240 to 400 km/h.

And despite the fact that there's the equivalent of a shotgun shell inside the dash, people still let their children ride this way, slouched in the seat with their feet up top.

If there's a crash, and they're lucky, they'll only break their legs. If they aren't, that bag will slam the thigh bones through the pelvis.

Airbags are a double-edged sword. They can prevent serious injury if you exercise caution around them, but they can also cause serious injury if you don't.

In any seat, always sit up straight and wear your seatbelt. The airbag is designed in conjunction with the belt, which holds you in the proper position so the bag protects instead of injures you.

When driving, hold the wheel correctly. If you "hook" the wheel underhanded on a turn, holding it with your palm facing you, a deploying airbag will snap your wrist.

If you hold the wheel one-handed at the top, your rings and watch will be shot into your face. It's safest to hold the wheel with both hands, at nineand-three. Don't curl your thumbs around the wheel, as they can be broken.

Plenty to love in Rogue

LORNE DRURY for Metro Canada

The Nissan Rogue has been one of the best-selling crossover vehicles on the market for the past couple of years.

Built on the same "C" platform as the Sentra sedan, it has been a hit right from its debut.

What helps set the Rogue apart is its aggressive styling — it's not quite

009 **Nissan Rogue**

Type: Compact crossover Price: \$24,398 to \$34,298 Engine: 2.5-litre four cylinder (170 hp, 175 lb/ft) with CVT transmission

Highlights

- Sleek exterior, interior Car-like handling
- a mini Murano, but certainly the Murano DNA is

all over it. It has a sleek, slippery exterior look and a wide aggressive stance.

The Rogue for 2009 is virtually unchanged from 2008 except for the addition of auto-locking power door locks.

The Rogue is available in S and SL models, with front- or all-wheel drive. A 2.5-litre four-cylinder engine, producing 170 hp, is standard. It is mated with Nissan's Xtronic continu-ously variable transmission (CVT) Also standard are traction control, fourwheel disc brakes with anti-lock and vehicle dynamic control.

The interior is just as attractive as the exterior, with the driver occupying a cockpit-like seating area. The instrument panel is well designed and the speedometer and tachometer are front and centre, easy to read through the steering wheel opening.

Prices for the Rogue start

The Nissan Rogue for 2009 has few changes from 2008, when it made a successful debut in the small crossover marketplace

at \$24,398 and top out at \$34,298 for the all-wheel drive SL with leather and technology packages.

Many crossover tomers are looking for carlike ride and handling and the Rogue delivers. The seats are supportive and comfortable and the ride is relatively smooth, even over pothole-scarred roads.

"Every man has his fault. and honesty is his."

-WILLIAM SHAKESPEARE

n the often twisted Canadian world of workplace law, both employers and em-ployees tend to exaggerate facts in an effort to improve their own cases. Whether it's a deliberate strategy or a simple white lie, our courts are increasingly signalling their disdain when stories without the conviction of truth find their way to trial. A decision from British Columbia reminds us all that honesty remains the best policy.

About halfway through

his apprenticeship as a repairman at Dams Ford Lincoln Sales Ltd. in Surrey, B. C., Tyler Marchen was given an envelope with two weeks' pay and his record of employment stating that he had been dismissed, and told to leave. When he asked why he was being fired, he was

told that it was not up for discussion and that he was no longer welcome on the property.

Marchen's dis-After Marchen's dis-missal, Dams made several comments suggesting that he was fired due to a po-Although lice matter Marchen was viewed as a good employee, his brother (who was also an employee at Dams) had been implicated in some thefts from the dealership. When a government employee called to request the reasons for Marchen's dismissal in order to qualify him for employment insurance, she was told it was due to a police issue and they couldn't risk keeping him on.

As Marchen and Dams had a fixed-term agreement for the duration of apprenticeship, Marchen promptly sued Dams, claiming that he was entitled to the value of the remaining term of the contract. As soon as Marchen started his legal action, Dams changed its story. It called the employ-ment insurance office and told it that, despite an investigation into Marchen's brother, it had actually fired Marchen because it had downsized its body

At trial, Dams' witnesses

denied that Marchen was fired because of his brother's potential theft but maintained its story that there had simply been a lack of work. Judge Richard Goepel convinced. He found that Marchen was dismissed because of Dams' unfounded suspicion that he was involved in his brother's potential theft and that it had deliberately attempted to mislead the court as to its true motives.

Dams' decision to mislead the court turned a seemingly routine case for wrongful dismissal into a legal nightmare. Marchen was awarded over \$18,000 in lost wages, another \$25,000 for loss of training and status, \$100,000 in punitive damages and most of his legal fees, usually awarded only in extraordinary circumstances.

The decision serves as a disincentive for companies to twist the facts of an employee's dismissal and in doing so demonstrates the mounting arsenal of damages a court can award where it considers an employee to have been treated unfairly.

If a company is not honest when it gives a reason for the dismissal of an employee, the company

IT professionals should stay connected in bad times

RAFAEL BRUSILOW for Metro Canada

While the unemployment rate in Canada rises, job opportunities are growing for people ready to meld their information technology (IT) know-how with business and communications skills, experts say.

Terry Power, president of IT staffing firm Sapphire Technology Canada, says IT skills have become a focus of employers who are actively looking for people with the right combination of IT and business skills, especially to take on executive and management posi-

"Anything that marries business and technology together will continue to be important going forward and we're seeing the greatest strength in senior-level roles," Power said.

While the unemployment rate recently sur-passed eight per cent across the country, Powers says the jobless rate in IT hovers around 3.5 per cent, showing that businesses place a high value on technology

"IT has become much more strategic for many businesses over the last four or five years," he said.

While the IT sector is faring better than others in the current economy, Powers warns that the trend doesn't mean all IT jobs have stronger employment prospects — in fact it's the higher-level IT positions requiring specialized experience and skills that are in the most demand.

"There's an increase in positions requiring people

The connections you have will benefit you down the road if you happen to lose your job and are back on the job hunt.

with very specific experience and high-level skills. The generalist, without a lot of experience in a given area, is having a tougher time finding a job while the

specialists are in demand." Power said.

For people with more general IT skills, Powers savs the key to success will be to focus on the specific

"Anything that marries business and technology will continue to be important."

Staffing firm president Terry Power

business advantages you can bring to the table.

"You must enhance your business relevance. Look at the last company you worked for and outline how vou made a difference. Try and understand the business value that you bring,' Power said.

Powers suggests thinking about how you can merge your business skills with technology in an effective way that maximizes your value to employers. Specifically, jobs in business analytics (analyzing data to explain trends and inform business decisions), customer communications and

IT-based accounting skills are growing in demand, he says.

If you're looking to do further IT training, shop around for programs that are focused on the business side of IT.

Even if you've lost your job, make sure to keep your finger on the pulse of what's happening in the industry and don't let valuable contacts slip away.

"The best advice I could give to anybody looking for a job is to stay connected find a way to stay out there in your industry community and do your homework," Powers said.

Absolute A Bath with a view

Two hours from London, Bath feels like a step back in time

EMMA E. FORREST Metro World News

It might be just two hours outside London, but you'll be transported back to the 18th century in the immaculately-preserved spa

town of Bath. This UNESCO World Heritage Site looks just like the set of a period movie which is probably why it has served as the backdrop for several major films including The Other Boleyn Girl and The Duchess.

You won't see fluores-cent shop signs here because there are strict regulations on how the town's splendid historical buildings should look.

Likewise, you won't find an industrial park on the edge of town — Bath is surrounded by a bowl of protected woodland and parkland

Instead you'll discover an elegant but laid-back town full of stunning neoclassical architecture, interesting museums, unique boutiques and pretty tea rooms.

Bath was founded by the Romans as a thermal spa, and it was in the 18th century, under King George III, that the stunning Palla-

Above, Bath's famous Royal Crescent

dian buildings blossomed around the centre.

The Roman spa is still at the heart of the town, and while you can take a tour of the site, you can't actually bathe in it (roman-

Getting there

• Fly to Bristol airport, then take the train or bus. Bath is two hours by train from Londons Paddington station, or three hours and 20 minutes by National Express coach from London Victoria.

visitbath.co.uk METRO WORLD NEWS baths.co.uk).

However, you can benefit from the spa's mix of 43 minerals since you can drink the therapeutic water at the Pump Rooms next door.

It's a genteel tea room complete with live cello, violin and piano music from the Pump Room Trio, the house band.
Enjoy the atmosphere

with a restorative cup of Earl Grey, and make your way up the cake stand, where you will find finger sandwiches, scones with jam and clotted cream, and a selection of homemade cakes.

If you're looking for a

more rustic snack, visit Sally Lunn's, a cramped tea room in the oldest house in town where giant Bath buns are served (sally lunns.co.uk).

Bath's healing waters have now been channelled into a state of the art fourstorey spa, complete with whirlpools, steam rooms, treatment rooms and even a heated open air rooftop pool where you can soak up the minerals while looking over the steeple of the city's famous Abbey (bathabbey.org).

Above, taking the waters at Thermae Bath Spa. Below, the historic Roman baths.

There's even a separate thermal bathhouse, The Cross Bath - fed by its own natural hot spring that can be hired for excluuse (thermaebath spa.com).

For more culture, you can learn about the city's most famous author, Jane Austen, at a museum dedicated to her, or attend the annual Jane Austen week festival.

Alternatively, catch a show at the stunning Georgian Theatre Royal, one of the city's most romantic venues, opulent decorated with ornate plasterwork, red velvet, gilt furnishings chandeliers atreroyal.org.uk).

The architectural pièce de résistance, however, is the Royal Crescent unique semi circle of elegant Georgian townhouses overlooking a garden. Stay at the luxurious hotel lolook at 18th century life at house No. 1, where the interiors are laid out as they would have been more than 200 years ago.

If you're on a romantic getaway, take a breath of fresh air in the Royal Victoria Park, a large land-scaped park opened in 1830. There you can stroll down the promenades and visit the botanical gardens with its collection of exotic plants.

It is also the route to the most romantic hotel in town, The Bath Priory. This

luxurious rooms and cosy drawing rooms for you to languish in.

Money = no object

This should be your final destination after spending the day looking at the sights of this aestheticallypleasing city. You can reward yourself with an aperitif on the terrace overlooking the hotel's award-winning landscaped gardens, and follow it with a meal at the only Michelin-starred restaurant in county bathpriory.co.uk).

You can't ask for more romantic than that.

Summer Camps

Summer camps can range from dance to horseback riding. Annapolis Royal's Equus Centre Residential Riding Camp has been teaching its campers to ride horses since 1984.

Just like school, only fun

JON TATTRIE for Metro Halifax

Summer camps are a bit like school, only with the dull bits taken out, says Nancy MacAloney, recreation program man-ager for HRM.

Some of them are dry land, some are aquatic, there are leadership camps for youth, sports camps, drama camps, dance camps, adventure camps and day camps," she says. "It's whatever your child is looking for, and whatever the parent is looking for."

Camps range from a few hours to week-long adventures and combine child care with a chance for kids to have fun, socialize and learn new skills.

While many camps have an educational aspect, "it's

not school at all. It's fun, fun, fun!" says MacAloney. They have been in school all year, so they've been programmed from September

to June.
"We try not to program them too much.'

The openness of summer camps can be great for kids who find the classroom stifling.

"A lot of those children have support when they go to school in the summertime, but when they come to camps, they don't need that same level of support, because the whole structure

is different," she explains. They have a little bit more freedom and can express themselves a little bit more than they could in a school setting.

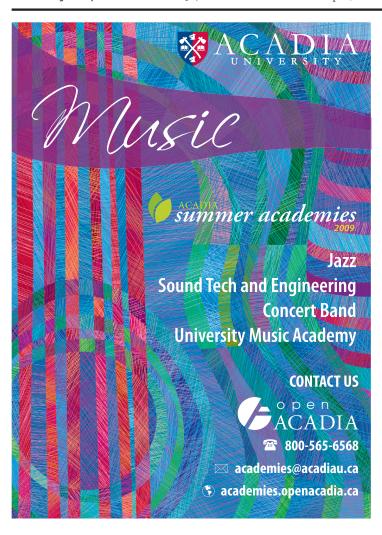

Jennifer Weidhaas spends her summers in fantasy land: She's run Annapolis Royal's Equus Centre Residential Riding Camp since 1984. Most campers ĥave an established love of horses, but some are novices.

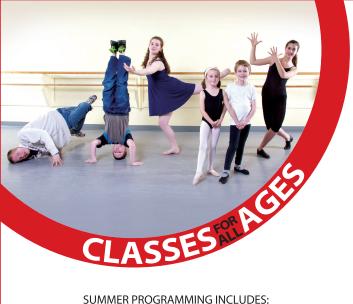

"It's normal to be nervous for the first few minutes, but generally once the kids who've been here before start telling stories, the

nerves go away pretty quickly," she says. "And they all have a keen interest in horses, of course, so that helps as well. Most of the time, it's nervous excitement."

The centre's 250 acres are nestled between the North Mountain and the Annapolis River, with trails, a hunt course, dressage ring and jumping ring and an indoor arena for when the weather is bad. Campers ride twice a day, mixing lessons, trail rides and games. Weidhaas says there are big social advantages to specialist sum-mer camps like hers, as kids meet other kids with the same passions.

"We get kids from the States, Ontario, Bermuda and all over the Maritime provinces. It's certainly a good chance to meet other people," she says

Kids 'stoked' while mom worries

JON TATTRIE for Metro Halifax

In our digital age, where parents are often expected to keep their kids under 24-hour surveillance, sending them into the woods for a week might not seem like the best idea, but devotees say summer camp gives children a chance to start to become adults.

Joan McInnes was apprehensive about sending her two boys off to Yarmouth's Camp Wapomeo this summer. In addition to the usual parental fears, the Chester woman was worried for her 11-year-old son Ben, who has Asperger's Syndrome.

"I was desperately concerned about whether or not they could handle his special needs," she told Metro.

"When I emailed [director Kathleen Whyte], she emailed me back and the title of her email was, 'Everyone is welcome at Wapomeo,' which just brought tears to my eyes. There are so many times when people are just not

Going to summer camp gives children a chance to start to become adults, devotees say.

comfortable with the unknown."

McInnes is feeling OK about nine-year-old Will going, too.

"I think he'll be fine. The only thing I'm worried about is him being too much of a boy," she laughs, "but that's going to happen regardless of whether he's here or there."

McInnes, who will be at home with her five-yearold daughter during the five-day camp, remembers well her first experience with summer camp. "The first two days, I was terribly homesick. I was feeling nauseous every night and thought there was no way I was going to survive," she says.

She had a change of heart, though. "Come the end of the two weeks, I didn't want to go home. I wanted to live at camp for the rest of my life."

Her boys are "totally stoked" and feeling no fear about camp. They are seasoned hikers, so she's confident they will take proper care in terms of sunscreen and outdoor safety. Asked if kids take cellphones to camp, she says, "I hope not!" Her boys don't usually have cellphones and she figures the lack of contact will be a good thing. "You have to let them

"You have to let them grow up and find their own path eventually. Camp is a wonderful place for them to learn that and spread their own wings," she says. "You just close your eyes and go for it."

The Halifax Citadel School of Piping and Drumming is a program run by the Halifax Citadel Regimental Association - a charitable, non-profit organization whose chief goal is the support of the living history program at the Halifax Citadel National Historic Site of Canada.

Teach your toddler to swim

Swimming lessons for children often begin when start school, but many people successfully teach toddlers or even babies to swim safely on their own — with adult supervision, of course.

Here are some easy steps:

Be positive

The basics of teaching a young child to swim are to keep things positive, smile speak reassuringly, and be sure to explain what you are about to do at every step. Use a 1-2-3 countdown when starting something new. Hold firmly, so the child senses he or she is safe.

Start with playing on the steps. Give them a toy, and let them get accustomed to the water. Ask them to pretend the water is paint and to cover themselves with their favourite colour.

Progress to blowing bubbles with them. Demonstrate by taking a big breath and blowing bubbles in front of them.

Be patient. Some children can be intimidated at the prospect of putting

Positivity is key when you are teaching children to swim.

their face near the water. Sit down on the top step with the child and show them how to kick. Keep legs fairly straight.

Prepare your child to put the face underwater by submerging an object or toy on the steps. Let your child ride on your shoulders to prepare them to glide. Bring them through chestdeep water. Move the child to dipping underwater with a 1-2-3 countdown. If water gets in the eyes, encourage children to wipe it away like a windshield wiper rather than rubbing.

The 'crab crawl'

Teach children to "crab crawl" along the wall to

get back to the steps. This is an important safety lesson — children will know there is a safe place to go if they are in distress.

Have your child use your shoulder as a pillow to learn the back float. The child's toes should be poking up through the surface of the water and the head tilted back.

Next, teach a prone glide with your arms supporting at the chest and waist or legs. Have the child hold arms straight in front and close the mouth. Gradually add the kick. Have your child sit on the side and lower them into the water as you step away from the wall.

Finally, combine all the learned skills by having your child push off the steps, kick, turnaround and head back to the steps. And remember, always demonstrate, speak reas-suringly and be patient. With a solid foundation of swimming skills and water safety, you and your child will be able to enjoy your pool together for years to NEWS CANADA

Expecting

36, is expecting her second child with her partner, direc tor Paul Thomas Anderson.

From Star Trek to Terminator

This month is a big one for Anton Yelchin — maybe the biggest in his life. With roles in a pair of high-profile summer releases Star Trek and Terminator Salvation — Yelchin's life has lately become a blur of flashy premieres around the world and press junkets at five-star hotels.

But he's trying to keep his wits about him. "These are all kind of the superficial elements of these kinds of features," he says, shrugging at the plush Beverly Hills hotel suite be's Hills hotel suite he's camped out in. "It's beyond the reason I do what I do.'

Yelchin is already enjoying the top spot at the box office with Star Trek, in which he takes over the

Anton Yelchin stars as navigator Pavel Chekov in the blockbuster hit Star Trek and Kyle Reese in the upcoming film Terminator Salvation.

role of Russian navigator Pavel Chekov — not much of a stretch for the Leningrad-born Russian-American, who came to the U.S. as a toddler with his figure-skating parents after the fall of the Soviet Union.

For Yelchin, who is mostknown for smaller films like Charlie Bartlett and the TV series Huff, working on summer blockbusters is less a job than a chance to fulfill some childhood fantasies. "Suddenly felt like I was five again," he says. "I used to be on this set in my mind in my backyard. It was a weird kind of nostalgia."

But unlike the franchise reboot of Star Trek, his next big summer film has the daunting task of picking up where a less-than-stellar previous installment left

off. "I went into this thinking this isn't going to be T3" he says, referring to Terminator 3: Rise of the Machines. "We're going to try and take this more serious-

ly," Yelchin says. And part of taking it more seriously meant the cast being more involved with the screenplay (by the same writers as T3). "I came to Albuquerque with a set of

guidelines and a breakdown of (my character) Kyle Reese, and I wasn't going to change those guidelines to change the script," Yelchin explains. "Every scene needed to be adjusted."

It's no coincidence that Yelchin, just two months past his 20th birthday, has aspirations beyond acting. "I love filmmaking. I really am a movie geek. I'm ob-

Movie **profile**

sessed with them," he says. He's even working on a screenplay — "a movie about teenagers, but kind of a self-conscious look at teenagers.'

And he shouldn't have much trouble moving behind the camera, since he practically grew up in film school. "It's the best free education you could get, just to work on a movie set and work with guys that know so much about what you're doing. You don't need to go to film school when you've had the opportunities that I have.

But with box office returns like he's been seeing, it might be a while before Yelchin gets a spare moment to get behind the camera.

Metro Recipe of the Day

Italian Spirals with Burst **Tomatoes**

INGREDIENTS:

1 lb (450 g) thin Italian sausage (salsiccia) 2 tbsp (25 ml) olive oil 2 cloves garlic 1 tsp (5 ml) dried oregano

1/2 tsp (2 ml) dried chili flakes 1 1/2 lb (680 g) cherry

tomatoes Salt and black pepper

GARNISH: Fresh basil leaves

METHOD

1. Preheat broiler to high. Cut sausage into quarters and wind lengths into coils. Pass thin metal skewer horizontally through each coil, then arrange all four on rack of grill pan.

2. Heat oil in large frying pan. Peel garlic and crush into oil. Then add oregano and chili flakes and fry gently 30 seconds, without allowing crushed garlic to change colour.

3. Spread tomatoes on top of garlic and chili, cover

and cook over low heat 10-12 minutes, or until most tomatoes have burst and are half-submerged in iuices.

4. Broil sausage coils 5-6 minutes per side, turning about to ensure even browning.

5. Uncover tomatoes, raise heat to moderate and cook 5 minutes, or until juices have thickened, Press lightly with back of spoon to ensure that all tomatoes have burst.

6. Season tomato sauce to taste with salt and pepper, then pour onto four warmed serving plates and put sausage coils in centres. Rinse and dry basil leaves, strip from stems, and scatter over top.
